

Khushi Shah

UX & INTERACTION DESIGNER · AI-INTEGRATED PRODUCTS

Creative technologist and MSc candidate in Media Design (Technology & AI) with 2+ years building AI-driven interactive experiences across web, AR, and real-time 3D environments. Hands-on in user-centered interaction design, AI-assisted prototyping, and iterative usability evaluation. Passionate about emerging AI interaction paradigms and designing interfaces that genuinely delight users.

WORK EXPERIENCE

UX & Interaction Designer

2023 – 2025

FirstCut Design Studio · JJJ-Itech Pvt. Ltd.

- Lifted user engagement on 3 live product interfaces by redesigning interaction paradigms — replacing static displays with gesture-driven panels, validated through on-site observation and post-session feedback analysis.
- Cut design iteration rounds by ~40% on a real-time data visualization dashboard by front-loading user pain-point mapping before wireframing in Figma.
- Enhanced clarity of 3D interactive training simulations by restructuring user flows and dialogue-based guidance — validated through iterative usability testing with domain experts.
- Maintained shared design systems in Figma across 5+ concurrent projects, cutting handoff errors across design, 3D, and dev teams.
- Explored emerging AI interaction paradigms by prototyping voice UX concepts using generative AI tools (ChatGPT, ElevenLabs), reducing early-stage concept iteration by ~30% and surfacing new AI-driven use cases for client review.

Junior Multimedia Designer

Jan – Mar 2023

Assist Design Automation Pvt. Ltd.

- Contributed to usability testing of AR/VR interfaces — identifying friction in prototype flows and communicating findings to senior designers, improving interaction clarity across 2 feature releases.
- Built annotated prototypes and workflow documentation, enabling faster developer handoff and reducing revision rounds.

RESEARCH & PROJECT EXPERIENCE

AI-Assisted Spatial Investigation Prototype

2024 – now

MSc Research · MediaDesign Hochschule Berlin

- Architected end-to-end interaction design for an AI-driven AR application (Afterglow) — integrating LLM-generated adaptive narrative into a real-time Unity UI system where interface responses adapt dynamically to user behaviour.
- Developed empirical study design comparing adaptive AI vs. fixed conditions, defining metrics: NASA-TLX, immersion scale, task time, error rate — direct experience in HCI user research.

Eterna — AI-Integrated Digital Legacy Platform

2024

Unity · React · Firebase · Blender · Cloudinary

- Designed and shipped full-stack platform serving 11+ active users — optimising UX for emotional clarity while reducing WebGL load size by ~30% through iterative performance testing.
- Implemented QR-based role-access system and presented design decisions to faculty panels, translating complex AI-interaction concepts to non-specialist audiences.

EDUCATION

MSc Media Design (Technology & AI)

MediaDesign Hochschule, Berlin

Apr 2025 – Sept 2026 (expected) · Human–AI Interaction · Spatial Computing

BA Digital Media & Animation

St. Joseph's University

2020 – 2023

LANGUAGES

Deutsch A2+

English C1

Hindi / Gujarati Native

3D & DESIGN TOOLS

Figma

Blender

Maya

Keyshot

Unity

Canva

ADOBE SUITE

After Effects

Premiere Pro

Photoshop
